Exercise Physiology placements (Albury Campus)
The Exercise Physiologist works full time in the Community Rehabilitation Centre (CRC). CRC provides interdisciplinary outpatient rehabilitation to patients living in the Albury region. Our team consists of; Physiotherapists, Occupational Therapists, Speech Pathologists, Dietitians, Social Workers, Nurses and an Allied Health Assistant.

The Exercise Physiologist delivers exercise for the prevention and management of chronic diseases including cardiac, respiratory, neurological, psychological and metabolic as well as musculoskeletal injuries. The Exercise Physiologist also works with clients and staff in the following CRC groups - Cardiac Rehabilitation, Pulmonary Rehabilitation and Falls Prevention.

Click here to see the Brochure for Cardiac Rehabilitation

Please research the following prior to commencing placement:

3. Pulmonary conditions and prescribing exercises
4. Strength and balance exercises appropriate for the falls prevention exercise group
