What is CDAMS?

The CDAMS Clinic is staffed by a multidisciplinary team consisting of experienced professionals, who specialise in the assessment of changes in memory and thinking.

The aim of the clinic is to assess memory and thinking changes early and provide you with an accurate diagnosis and an individual management plan. Support and advice is also offered to families and carers.

We work closely with your General Practitioner and specialists who may also be coordinating other services for you.

Referral

A written referral from your General Practitioner or Medical Specialist is preferred, although we will accept self referrals.

Prior to attending the clinic, information about your full medical history, along with a number of medical tests are required. This information assists us to be accurate. Your General Practitioner will arrange these.

The CDAMS Team consist of:

- Geriatrician
- Nurse Practitioner
- Neuropsychologist
- Social Worker
- Occupational Therapist

What does CDAMS Offer?

People referred to CDAMS will have access to:

- A complete memory assessment
- An accurate diagnosis of memory or thinking problems
- An individual management plan, with recommendations of how to improve your health
- Memory strategies to make day-to-day living easier
- Referrals to community services, including Alzheimer’s Australia, Victoria and NSW
- Support and direction regarding planning for the future
- The Living with Memory Loss Course
